Condensing Stainless Steel Water Heater

TWI 35-130/45-190

Fully room-sealed condensing high-efficiency water heater (95% gross)

- Stainless steel tank
- No anodes simplify maintenance
- Premix Low-NOx burner saves the environment
- Whisper quiet operation
- Specially designed blower and burner minimize noise
- Plug-and-Play technology; connect air inlet, exhaust outlet, water, electricity, and gas, set the temperature and the system functions properly
- Three external LED lights indicate operational status of water heater
- Full serviceability from the front
- Suitable for natural gas and propane

Further installation and connection details can be found in the Installation & Commissioning Manual.

Installation options

Further information on the flue gas discharge materials can be found in the Installation & Commissioning Manual.

A Twister water heater should be installed according category B23, C13, C33, C43 or C53*.

	TWI 35-130 Ø80/125	TWI 45-190 Ø80/125
Concentric

Lequivalent/bend 45° (m)	1.1	1.1
Parallel (larger diameter for more length)		
Diameter (mm)	100	100
Max. length (m)	100	75
Lequivalent/bend 90° (m)	4.6	4.6
Lequivalent/bend 45° (m)	1.2	1.2
* All Twisters are also approved for installations where the unit is supplied without venting materials (C63).		
Concentric flues		
It is not permitted to use more than the specified number of bends, even when the duct is shorter than the maximum length. A 45° bend is equivalent to a 90° bend.		
Parallel flues		
- The maximum permissible length should be reduced by the equivalent length of each bend. (Note: for a parallel installation this means that 3 changes in direction amount to 6 bends (3 in the supply duct and 3 in the flue).		
- The maximum length also applies if a parallel installation has different supply and flue duct lengths (B23, C53)).		
- Combined flues (C43) shall be fitted with a condensate drain.		
Note: horizontal flue runs must be installed with a fall of at least 5 mm per metre towards the heater.
